"Perfection is possible"

WHO WE ARE

Purebeau USA is the leader in micro pigmentation industry for professionals throughout the United States.

Like our parent company, the Germany-based Purebeau-Pro, we are dedicated to supplying our clients with innovative, technologically advanced, and forward-thinking products that benefit both businesses and their clients.

We are passionate about the permanent makeup industry, which improves the lives and appearances of countless men and women with maximum safety and minimal discomfort.

Permanent makeup is among the beauty industry's fastest growing areas, and we look forward to expanding our services throughout the U.S. market.

At Purebeau USA, we offer an extensive selection of top quality, precision micro pigmentation equipment, training, and client services. We provide rigorous training for those who are new in the industry and advanced programs for those who want to improve and enhance their ability to use our products safely and effectively.

Purebeau USA products and training programs are unsurpassed in the industry, and we take pride in staying ahead of the technological curve. Keeping our clients satisfied requires paying special attention to the permanent makeup market's newest advances and trends.

From our vast color selection, suited to every skin tone, to our numerous accessories that allow customization of the process to suit each client, we strive to maintain one of the most respected and cutting-edge brands in the permanent makeup industry.

OUR MISSION

Purebeau USA's mission is to educate professionals within the permanent makeup industry, and to supply them with superior products that enable the safest and most effective application of permanent makeup.

WHY CHOOSE PUREBEAU

Whether you are a permanent makeup artist looking for superior equipment, or a potential client interested in achieving a more youthful appearance, Purebeau USA offers the highest standard of permanent makeup. We are passionate about both micropigmentation and our individual clients. Our standards for quality, safety and functionality are unmatched. We aim to not only meet, but exceed the expectations of our clients.

Purebeau USA's services and equipment are available for all fields of cosmetology and aesthetic medicine. We warmly welcome professionals of all related areas to explore our products, services and training programs. Please contact us if you have any questions about how we do business. We look forward to working with you.

TRS TURBO
TRS TURBO

HANDPIECES HYGIENE SYSTEM

Purebeau needles are made from surgical steel and laser-finished to provide maximum precision and minimal skin discomfort, resulting in consistent micro pigmentation procedures and long-lasting results.

Revolutionary Back Flow Protection System guarantees the highest standards of hygiene

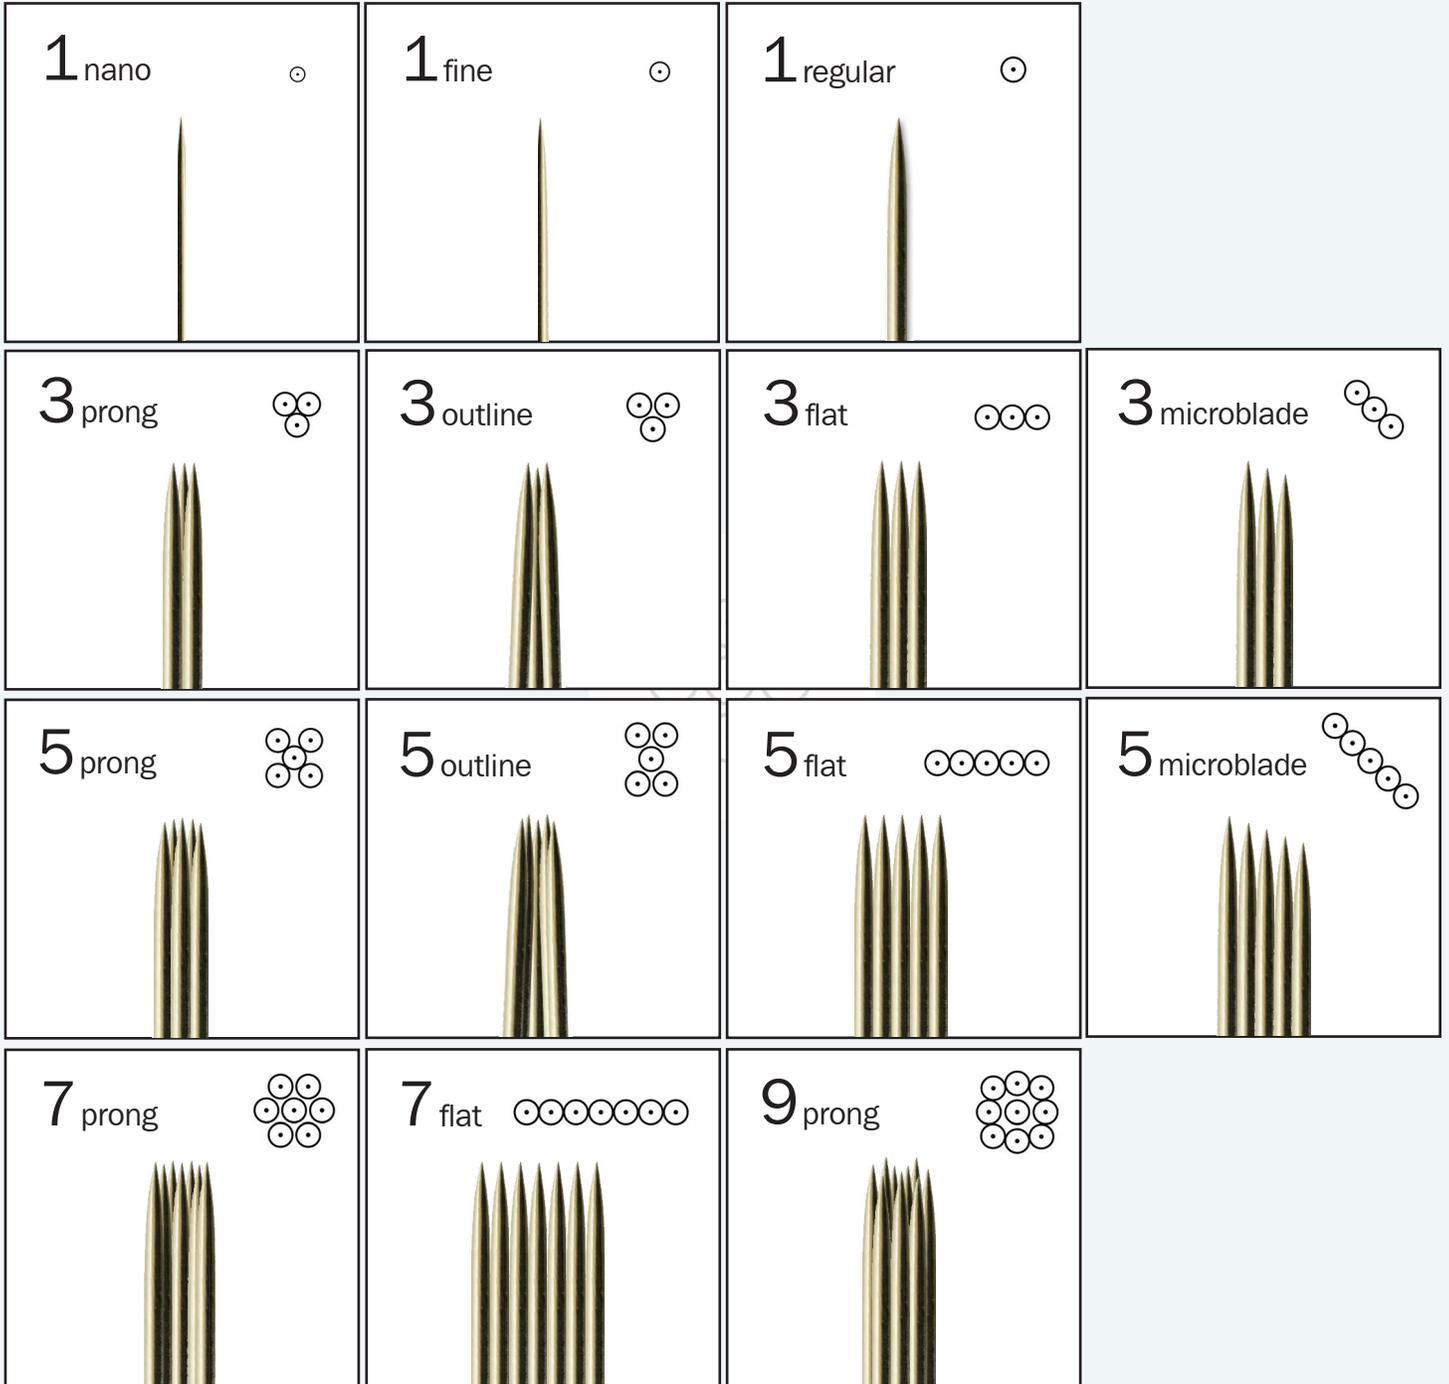

safety. Return protection sleeve prevents pigment and airborne contaminants from entering the hand piece.

Purebeau protection system meets all international safety requirements.

Needles are disposable and sealed in individual sterile packages.

NEEDLES

CARTRIDGES

Purebeau's integrated needle system with protection sleeve guarantees the highest standards of hygiene safety.

The return protection sleeve prevents airborne contaminants and pigments from entering the hand piece.

This revolutionary Back Flow Protection System meets all international requirements. Disposable cartridges are held in individually sealed and sterile packages.

Purebeau needles were developed using principles applied to design of the finest acupuncture needles. The needle's shape is designed to minimize skin irritation and to provide the highest possible precision for placing pigment in the skin; exceptionally fine and sharp, for smooth entry and minimal discomfort.

The precise placement allows for consistent and long-lasting results.

The cartridge needles are available in 9 different configurations.

MICRONEEDLING

The newest concept for Purebeau hand piece, transforms our device into a versatile tool. It can be used for skin rejuvenation or as medical device.

Micro needling technology allows for non-surgical, non-invasive comprehensive skin regeneration treatments of various conditions; An ideal solution to treat scarring, stretch marks or signs of aging such as wrinkles, hyperpigmentation and age spots.

Cartridge equipped with 20 ultra-thin needles creates invisible micro perforations of the epidermis to stimulate skin receptors and activate natural repair mechanisms (Tissue Activation Therapy.)

The treatment involves placing active substances to permeate through the epidermis and

underlying layers of the dermis to stimulate production of collagen and elastin.

Purebeau digital device with precision hand piece guaranties equal depth and needle guidance, optimal results without risk of skin trauma and minimal discomfort.

MICROBLADE

Microblading it's a manual method done using a very fine blade to deposit pigment into the dermis. This method is ideal for anyone wanting to enhance the look of their eyebrows.

The results are natural looking, hair-like strokes. Purebeau offers microblading needles in four different sizes #7, #12, #15, U shape and Micro blade sets.

PUREBEAU EXCLUSIVE #20 CARTRIDGE

Elite cartridge hand pen dual action microneedling/scalp pigmentation.

SCALP MICRO PIGMENTATION (SMP)

Experience Purebeau's newest addition to the hand pieces of Master Collection. Transform Purebeau equipment into medical-grade scalp pigmentation tool. The cartridge is equipped with 20 ultra-thin needles to place pigment into the dermal layer of the skin. The scalp micro pigmentation process creates micro-dots that replicate the effect of hair follicles, creating a densification effect.

SMP is an excellent option for alopecia patients, thinning hair areas, blending scars, baldness in men and women.

SMP not only gives an illusion of fuller head of hair, but also stimulates new hair growth by repetitive insertions of micro needles to the dermal skin layer.

American culture places considerable value on beauty and youth. The field of cosmetology and makeup has been expanding rapidly and offers a variety of career opportunities. The demand for professional micro pigmentation specialized services range from beauty salons and spas to plastic surgeons and dermatologist offices. If you are considering becoming a micro pigmentation professional, there is no better time to embark on this exciting and rewarding career.

At PureBeau Academy, we offer comprehensive micro pigmentation training programs. Our method will provide you with a solid foundation in permanent cosmetics application and skills necessary to develop a successful career.

Basic Training Course

The training course to become a Certified PureBeau Permanent Cosmetics Specialist is very intensive and limited to a maximum of 6 participants per class. By restricting the class size, we can guarantee personalized attention and the highest quality of instruction.

We provide beginner to advanced level training. Our professional trainers possess experience in permanent make up, medical pigmentation, and business administration to ensure the highest educational standard for Purebeau US Academy's students.

The academic content in our curriculum has been carefully planned and is regularly updated with most up-to-date techniques and resources.

We create permanent cosmetic professionals with superior technical skills and ethical standards to guarantee a great start to their new career.

Advanced Course is a refresher course for practicing professionals, which provides skill building training on the latest techniques and technology. We also offer seminars for trainers and professionals in paramedical pigmentation. The advanced courses are tailored to participants' practical experience and level of interest in current industry trends and standards.
