EYEBROWS: hair strokes, 3D, ombre, powder.

LIPS: lip liner, full lip, color, ombre lips, 3D lip.

EYES: smoke eyes, eyeliner, eyelash enhancement.

FIBROBLAST

non surgical lift technology

Fibroblast treatment is a non-surgical lift procedure giving the same results as traditional surgery. It is safe and bloodless, without the need for anesthesia. This innovative technique will not cause overlifting, affecting only the excess skin.

During the procedure tiny plasma flash also referred as an electrical arc is being discharged from the tip of the Fibroblast handpiece. The tool itself never touches the skin however plasma flash creates a tiny dot upon the contact. There is no cuts, no blood. This innovative technology uses sublimation process, turning solid directly to gas to tighten skin tissue. Targeted tissue sublimate, causing no damage to surrounding areas or deeper skin layers.

Further points are applied creating a symmetrical grid over the treatment area. Effects are noticeable right away. Full results become visible after 2-4 weeks. Patient can resume regular activities right away with minimal discomfort.

Numbing cream is used to minimize discomfort during procedure. Side effects are minimal and complications rare. Carbon crusts, a tiny superficial dots which form directly on the skin are part of normal healing process. Correctly treated with after-cream will cause no threat and fall off 5-7 days after treatment.

Some of the most popular treatments include:

eyelid lifting/tightening, wrinkle reduction, neck tightening, reduction of the upper lip wrinkles, stretch marks and scars.

HANDPIECES

FIBROBLAST HAND PIECE
Compatible with Elite, TRS, Circle Pro

NEEDLE HAND PIECE
Operating needle speed 50-180Hz
Compatible with TRS, Circle Pro, Mobile 01

* Each individual needle requires specific needle tip.

CARTRIDGES

Purebeau's integrated needle system with protection sleeve guarantees the highest standards of hygiene safety.

The return protection sleeve prevents airborne contaminants and pigments from entering the hand piece.

This revolutionary Back Flow Protection System meets all international requirements. Disposable cartridges are held in individually sealed and sterile packages.

Purebeau needles were developed using principles applied to design of the finest acupuncture needles. The needle's shape is designed to minimize skin irritation and to provide the highest possible precision for placing pigment in the skin;

exceptionally fine and sharp, for smooth entry and minimal discomfort.

The precise placement allows for consistent and long-lasting results.

The cartridge needles are available in 9 different configurations.

#20 Microneedling cartridge

Cartridge #3 point

PUREBEAU EXCLUSIVE #20 CARTRIDGE

Elite cartridge hand pen dual action microneedling/scalp pigmentation.

CARTRIDGES TYPES

<p>1 point</p> 	<p>1 fine line</p> 	<p>2</p> 
<p>3 point</p> 	<p>3 flat</p> 	<p>5 prong</p> 
<p>7 prong</p> 	<p>7/3 point</p> 	<p>20 microneedling/scalp</p> 

MICRONEEDLING

The newest concept for Purebeau hand piece, transforms our device into a versatile tool. It can be used for skin rejuvenation or as medical device.

Micro needling technology allows for non-surgical, non-invasive comprehensive skin regeneration treatments of various conditions; An ideal solution to treat scarring, stretch marks or signs of aging such as wrinkles, hyperpigmentation and age spots.

Cartridge equipped with 20 ultra-thin needles creates invisible micro perforations of the epidermis to stimulate skin receptors and activate natural repair mechanisms (Tissue Activation Therapy.)

The treatment involves placing active substances to permeate through the epidermis and

underlying layers of the dermis to stimulate production of collagen and elastin.

Purebeau digital device with precision hand piece guarantees equal depth and needle guidance, optimal results without risk of skin trauma and minimal discomfort.

MICROBLADING STARTER SET

Microblading it's a manual method done using a very fine blade to deposit pigment into the dermis. This method is ideal for anyone wanting to enhance the look of their eyebrows.

The results are natural looking, hair-like strokes. Purebeau offers microblading needles in four different sizes #7, #12, #15, #12 Round micro blade sets.

American culture places considerable value on beauty and youth. The field of cosmetology and makeup has been expanding rapidly and offers a variety of career opportunities. The demand for professional micro pigmentation specialized services range from beauty salons and spas to plastic surgeons and dermatologist offices. If you are considering becoming a micro pigmentation professional, there is no better time to embark on this exciting and rewarding career.

At PureBeau Academy, we offer comprehensive micro pigmentation training programs. Our method will provide you with a solid foundation in permanent cosmetics application and skills necessary to develop a successful career.

Basic Training Course

The training course to become a Certified PureBeau Permanent Cosmetics Specialist is very intensive and limited to a maximum of 6 participants per class. By restricting the class size, we can guarantee personalized attention and the highest quality of instruction.

We provide beginner to advanced level training. Our professional trainers possess experience in permanent make up, medical pigmentation, and business administration to ensure the highest educational standard for Purebeau US Academy's students.

The academic content in our curriculum has been carefully planned and is regularly updated with most up-to-date techniques and resources.

We create permanent cosmetic professionals with superior technical skills and ethical standards to guarantee a great start to their new career.

Advanced Course is a refresher course for practicing professionals, which provides skill building training on the latest techniques and technology. We also offer seminars for trainers and professionals in paramedical pigmentation. The advanced courses are tailored to participants' practical experience and level of interest in current industry trends and standards.
